

lighting design

improving the quality of light for your facility...

H2M offers fully integrated lighting design services, engineering, and evaluations that enhance architecture, optimize energy, reduce maintenance, and increase productivity. As environmentally responsible electrical engineers, we design innovative lighting solutions that improve the lighting quality of your facility and create an environment that promotes overall wellness. H2M is committed to provide quality service and innovative engineering solutions to the electrical lighting design field. We strive to create performance-based design solutions using cost-effective, energy-efficient fixtures, and controls that will produce the perfect balance between functionality and aesthetics while meeting the needs of the project occupants.

lighting-before upgrades

lighting-after upgrades

H2M is a multi-disciplinary professional consulting and design firm, proud of our long history of client service and our consistent ability to meet tough architectural, engineering, and environmental challenges head-on. Since 1933, H2M has helped design and build many of our local communities; from water treatment facilities to firehouses; schools to road reconstruction; and environmental site assessment to groundwater remediation. Since our early roots, our focus has remained steadfast: to provide quality service with sound judgment and to serve our clients as an honest and professional resource.

We offer a practical approach with creative results.
