

asbestos services

H2M has long supported the insurance industry with environmental claims management including asbestos, bulk sampling, and abatement project monitoring. More specifically, our services include:

- Asbestos Investigations
- AHERA Inspection and Management Plan
- Asbestos Abatement Design + Specification
- Project Management/Project Monitoring/Air Sampling Services
- Physical and Hazard Assessment
- Bulk Sampling
- Abatement Cost Estimate
- Applicable Federal, State and Local Rules, Regulations Review and Variance Application
- Laboratory Analysis (Third Party Laboratory-Not In-House)
- Liaison between Owners and Regulatory Agencies
- Policy Development
- Litigation Support
- Operation and Maintenance (O&M) Program Development
- OSHA Compliance Asbestos Inspection

H2M's experienced asbestos inspectors are knowledgeable in identifying suspect asbestos containing materials; and can provide the expertise necessary to follow through on all asbestos abatement phases.
